Assignment: Speech and Language Processing Techniques

Introduction

In this assignment, you will write a two-page technical report (min 800 words) on "using speech and language processing techniques to solve a real-world problem."

Report scores grading (7 points)

The technical report should include:

- A two-page technical report (min. 800 words)
- The report includes a proposal with originality and creativity, software, and results.
- Overall score (originality, creativity, and results): 3 points by teaching team's voting.
- Survey of prior works (survey of 3-5 papers): 2 points
- Implementation (software) and results: 2 points

Here is the template that you can use: Overleaf Template. Please remove unnecessary sections.

Review score (3 points)

Please score three reports of the others according to the following criteria.

- Is a two-page technical report (min. 800 words)?
- Does the report include a good proposal with originality, creativity, software, and results?
- What is the overall score (originality, creativity, and results) and comments?
- Does the report have a survey of prior works (survey of 3-5 papers)?
- Does the report have implementation (software) and results?

The teaching team will determine your score (0-3 points) by evaluating your review score and comments..
